

## dimanche 22 juin 2025 23:00

Merci xylitol pour ce tuto 😊

Ensuite on va chercher les modules avec **alt+E**

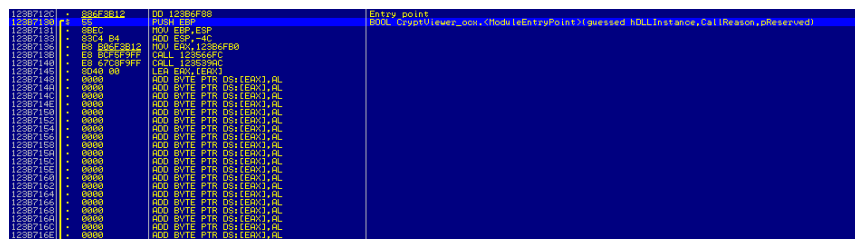

Quand on lance le visiocharme sur le cd on repère que ce module est apparue.

|            |                  |                     |        |

On va chercher les strings :

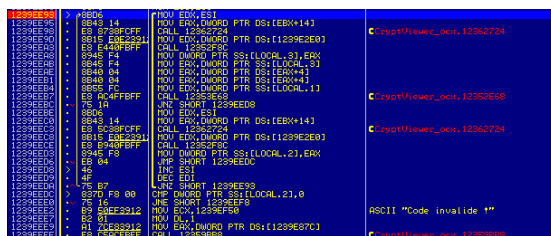

On voit bien qu'on est dans la bonne direction :

On double clique sur code invalide et on se retrouve sur les instructions :

On va poser un BP en haut de la procédure :

Et voilà on a réussi hihi :)
